

Cyber and Information Security

100% online

OVERVIEW

Be at the forefront of preventing - and investigating - computer hacking and other computer-related crimes

Minnesota State College Southeast's Associate of Applied Science (A.A.S.) degree in Cyber and Information Security is a unique program incorporating networking, cyber security, forensics, and criminal justice to prepare students for employment in a very high demand profession.

In addition to networking and digital, computer and electronic forensics, students will become familiar with the various components of the criminal justice system. Students will learn how to collect and maintain evidence, use interpersonal communication skills, write effectively, present and testify in court, and liaison with criminal justice agencies.

Whether you are a law enforcement professional seeking expertise in this growing field, or a network administrator working for a company that needs to protect its data, Cyber and Information Security at Southeast Technical can help you gain the skills you need for an exciting new career.
